TITLE OF INVENTION: RECOMBINANT DNA COMPRISING DNA CODING
TITLE OF INVENTION: FOR MYOSIN HEAVY CHAIN SM. ISOFORM PROTEIN INSERTED INTO
TITLE OF INVENTION: VECTOR DNA, MICRORGANSIM CARRYING THE RECOMBINANT DNA, AND
TITLE OF INVENTION: AN AGENT FOR TREATMENT OF ARTERIOSCIEROSIS COMPRISING THE
FILLE OF INVENTION: RECOMBINANT DNA
FILLE REFERENCE: 07898-013001
CURRENT APPLICATION NUMBER: US/08/875,435B
PRIOR RAPLICATION NUMBER: PCT/JP96/00134
PRIOR FILING DATE: 1996-01-25
PRIOR FILING DATE: 1996-01-25

Patent No. 6551795
GENERAL INFORMATION:
APPLICANT: Marc J. Rubenfield et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: ARRUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT APPLICATION NUMBER: US/09/252,991A
                                           2090
                                                                                                                              1888
                                                                                                                                                                                                                                                                                                                                                                                                         1655
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    1535
